Client Money & Asset Ownership

NORVEL CAPITAL · Information for review · 27 October 2026

Records and providers

NORVEL records client balances and transaction status in its internal ledger. Payment providers process transfers under their own terms. A dashboard balance is an accounting record, not a bank deposit or independent confirmation of custody.

Ownership

The legal title, counterparty, asset and custody arrangements for any product must be stated in the executed product agreement and supporting evidence. Do not infer direct ownership of a specific share, vehicle or property from a general product page.

Reconciliation

NORVEL should reconcile provider confirmations, internal balances and supporting records. A discrepancy should be reported promptly and reviewed before final settlement. No bank protection or regulatory guarantee is represented here.
