Sharia Approach & Screening

NORVEL CAPITAL · Information for review · 27 October 2026

Approach

The four product areas are described as intended for review against applicable Islamic finance principles. A label on the website does not by itself establish that any specific issuer, instrument or transaction is Sharia-compliant.

Screening

For global markets, review the issuer, activity, financial ratios and instrument structure. For installment products, document the identified asset, ownership chain, purchase and sale prices, payment schedule and risk allocation before commitment.

Governance

The actual methodology, reviewer, standards, exceptions and any independent Sharia opinion must be disclosed in final product documents. NORVEL does not claim an independent Sharia certification in this draft.
